

BIOGRAPHY

Richard J. Wenstrup, M.D.

Chief Medical Officer, Myriad Genetic Laboratories, Inc.

Richard J. Wenstrup has served as Chief Medical Officer at Myriad Genetic Laboratories, Inc. since 2006. In his current role, Dr. Wenstrup leads the Clinical Affairs and Corporate Medical Services Departments.

Prior to his current role, Dr. Wenstrup served as a tenured professor of Pediatrics (Human Genetics) at Cincinnati Children's Hospital and professor of Biomedical Engineering at the University of Cincinnati. At Cincinnati Children's Hospital, he founded the Molecular Diagnostic Laboratory and was one of the founders of AssureRx, LTD, based on work at that laboratory. He previously held appointments in medicine, pediatrics and cell biology at Duke University Medical Center in Durham, North Carolina and in the Department of Pediatrics at the University of Washington in Seattle, Washington.

During his time in academia, Dr. Wenstrup was internationally recognized for his research in heritable disorders of connective tissue and the skeleton. His published scientific work in human and mouse genetics includes authorship of over 100 peer-reviewed papers

Dr. Wenstrup, who is licensed to practice medicine, is a member of more than a half-dozen professional scientific/medical organizations, including the American Association for the Advancement of Science, American Association for Cancer Research and the American Society of Human Genetics. During the past decade he has served extensively on NIH study sections, both as a charter member and as an ad hoc reviewer. He is past president of the Medical Advisory Boards of the Ehlers-Danlos National Foundation, and the Osteogenesis Imperfecta Foundation (U.S.). He also served as chairman of the scientific advisory board of the OIF, and currently serves as a member of the scientific advisory board of the Marfan Foundation.

Dr. Wenstrup earned his medical degree from the University Of Cincinnati College Of Medicine and completed a pediatrics-focused residency at the University of Minnesota Hospitals in Minneapolis, Minnesota and a fellowship in medical genetics at the University of Washington's Department of Medicine in Seattle, Washington.
